QUEEN OF HEAVEN

NICHOLAS ROERICH

NICHOLAS ROERICH today stands as one of the greatest voices of the Century—an artist whose creative genius has been recorded in three thousand masterpieces, of which one thousand are in the Roerich Museum, New York, a monument to his art and to his cultural leadership; and two thousand in the leading museums of twenty countries of the world. His achievements as archaeologist and scientist; as philosopher and as Leader of the movement for International Unity through Culture, are no less stupendous. His is a multi-faceted genius, constantly questing, constantly evocative, undeviating from the ardent goal of his existence—greater brotherhood through Culture.

The spirit of this work is thus amply indicated in the Publisher's Note:

"The 'Realm of Light' is the Sixth Volume of the American Edition of Nicholas Roerich's Works. The first volume was 'Adamant'; the second, 'Altai-Himalaya'; the third, 'Flame in Chalice'; the fourth, 'Heart of Asia'; the fifth, 'Shambhala.'

"The general device of these Books, multifarious in their contents, yet united in their inner striving, is *The Call to Culture*. And by his term 'Realm of Light' the author signifies the human heart. . . .

"It is of exceptional significance that, through the Societies dedicated to him in all continents, the name of Nicholas Roerich is so universally proclaimed and impressed upon human hearts, not only as Master of the brush but also as a thinker and a builder of life. In studying the Biography of Roerich one is confronted by a great chain of real, indisputable facts. Through his indefatigable creativeness, his daily labour and achievements, Roerich acquires in universal measure that synthesis which reconciles and solves the most difficult problems. Mark what subtle psychology and benevolent compassion is suffused through his addresses to the Societies bearing his name. He never disparages—on the contrary, his emphasis everywhere is on the most positive, creative foundations."

For those who realize the cultural need of this moment, this superb book of Nicholas Roerich will provide an inspired and uplifting call. It may well be summed up in his own words:

"You shall know that in *that* country, where Knowledge and Beauty will be revered, there will be peace. Let all ministers of war not be offended if they have to concede their priority to the ministers of public education. In spite of all homunculi who spy from their holes, you shall fulfill your duties of great Culture and you shall be fortified by the realization that only homunculi will remain as your enemies. Nothing can be nobler than to have the homunculi as your enemy. Nothing can be purer and more elevating than the striving for the future country of Great Culture."

Proceeds from the REALM OF LIGHT have been donated by the author to the Fund for Cancer Research and Bio-Chemical Laboratories of Urusvati, Himalayan Research Institute of the Roerich Museum.
