PUBLISHERS AND BOOKSELLERS IN NEW YORK CITY AT 67 W. 44th ST. - Tel. Vanderbilt 3-6961

A VITALLY IMPORTANT WORK!

"ROERICH'S LIFE AND PHILOSOPHY OF EDUCATION"

G. H. PAELIAN, PH.D.

*** Here is a vitally important new book in the field of education. It offers every student and teacher the outline of an educational system which aims to correlate all knowledge, giving the modern generation a unified, universal viewpoint on life.

*** ROERICH'S LIFE AND PHILOSOPHY OF EDUCATION describes in fascinating detail the philosophy, art poetry, and accomplishments of Nicholas Roerich, one of the greatest educators of modern times. It contrasts his educational experiment with that of Professor John Dewey -- a system that in many respects represents the philosophy of today.

*** The author of this significant work is G. H. PAELIAN, a writer of note on scientific and philosophical subjects. That his research has been thorough is evident on every page of this volume, and the published bibliography will be added interest to students.

*** Prof. Paul R. Radosavljevich, New York University expert in experimental education, writes in his introduction to this new volume: "Dr. Paelian's study of Roerich's contribution to modern education is up to date, and is badly needed in our schools for broadening the viewpoint of our students of education from both theoretical and practical standpoints."

ORDER DIRECTLY FROM

FORTUNY'S, Publishers
New York, N. Y.
