

From "Agni Yoga"

"One may rejoice when the dates of great events flow by. No destruction can confound the realization of the reality of the growth of cosmic combinations. Such combinations must fill us with joy. If we realize them, it means we partake in them. And even a partial, if conscious, participation in the cosmic process, is already a great victory of the spirit. The striving toward the far-distant worlds is the natural tendency of the human spirit, remembering its inter-planetary experiences. It is essential to direct humanity toward the path of far-off worlds. Such striving can take us beyond all mockery of ignorance to true reality."

AGNI YOGA

HOW shall humanity withstand?

How will man master the mighty cosmic rays, the magnetic superworld currents, which western science is now beginning to discover?

As in the case of Western Science, the great thought of Asia sees our present age as an Era of Fire. Out of the Space which surrounds our planet, great cosmic fiery streams are inundating the world.

In Agni Yoga, for the first time, is brought to the West this Yoga of Fire, as it is called. This teaching is the great Vedic recognition of the new forces which are approaching humanity, the new evolutionary

processes which are beginning to make themselves felt. AGNI YOGA tells of the mastery of these energies as conceived by the East in accordance with its age-old traditions. In this work is reflected the means of utilizing the energies which fill the Macrocosm and which are equally demonstrated in the microcosm.

~~Some of the subjects treated are Indications on Psychic Energy as a new human evolutionary development—Imperil, the Crystal and Poison of Anger—Modern Epidemics and their relation to the new Extra-World Forces—Their cure.~~

Many other subjects are discussed in this highly significant work which is of as great interest to the scientist, as to the student, philosopher, orientalist and physician.
