FIERY WORLD

A New Book Continuing the
“Agni Yoga” Series

“Thus Let us Advance from the Covenants
of the Past Into the Achievements
of the Future”

Price \$1.00

FIERY WORLD

"Fiery World" is the fourth volume of the Agni Yoga Series to be published in English. As with the previous three volumes, "Fiery World" continues the Great Teaching of the East given to contemporary humanity in this hour of cosmic import.

In "Agni Yoga", the first Book of this Series, was set forth the Yoga of Fire, Asia's immemorial concept of the present Era with its mighty evolutionary processes, its superworld currents and the labors of Cosmos for the salvation of Earth.

"Hierarchy", the Second Book, expresses the Link of the individual with the Great Hierarchy, Which guides the universal evolutionary process, and the compassionate aid given to man in his striving towards perfection.

"Heart" propounds the sesame to this Great Link—the Heart as the intermediary between man and the Infinite Forces of ascent. Thus, as is said, "Verily the Silver Thread which links the Teacher with the disciple is the Great Magnet of the Heart".

In "Fiery World" we are carried into that realm of fiery striving which opens before the human spirit. As is said, we must pass "from the covenants of the Past into the achievements of the Future", and the tremendous import of the Book is reflected in its opening call: "The element

of Fire, omnipresent, most creative, most vital, is least observed and valued. The human consciousness busies itself with a multitude of inane and unworthy considerations, but that which is most wondrous eludes it. People quarrel over a pice in the bazaar, but they have no desire to stretch out their hands to the treasures. Much which was said of the Heart must also be applied to the Fiery World but still more poignantly. The impetus of Fire is as powerful as the structure of the crystal. You were correct in putting forth the examples of the crystal during the talk about Fire. Globes and crystal spheres were used not casually by clairvoyants. Live embers are needed for the purification of the consciousness; the rainbow flame affirms the striving of the spirit. A multitude of applications of the work of Fire reveal themselves as the most extraordinary circumstances of Existence. Beginning with the ordinary light formations accessible to the open eye, up to the complex fires of the heart, we are led into the Realms of the Fiery World".

"How may one obtain success—Remember, through joy. Not through despondency but through joy. Do not permit the thought of questioning the possibility of impossibility. The thought may arise whether your joy suffices to consummate the harvest. We always advise joy. You should acknowledge and remember that you have won success only while rejoicing. Certainly, this does not mean the gamboling of a calf on the meadow, but the creative joy which
